

Correction

 Script Python

```
1 def selection_enclos(table_animaux, num_enclos):
2     table = []
3     for animal in table_animaux:
4         if animal['enclos'] == num_enclos:
5             table.append(animal)
6     return table
```
