

# Correction

Script Python

```
1 def min_et_max(tab):
2     d = {}
3     d['min'] = tab[0]
4     d['max'] = tab[0]
5     for val in tab:
6         if val < d['min']:
7             d['min'] = val
8         if val > d['max']:
9             d['max'] = val
10    return d
```
