

Correction

Script Python

```
1 def moyenne(nom, dico_result):
2     if nom in dico_result:
3         notes = dico_result[nom]
4         total_points = 0.
5         total_coefficients = 0
6         for valeurs in notes.values():
7             note, coefficient = valeurs
8             total_points = total_points + note * coefficient
9             total_coefficients = total_coefficients + coefficient
10        return round( total_points / total_coefficients, 1 )
11    else:
12        return -1
```
