

Correction

 Script Python

```
1 def indices_maxi(tab):
2     val_max = tab[0]
3     ind_max = []
4     for i in range(len(tab)):
5         if tab[i] > val_max:
6             val_max = tab[i]
7     for i in range(len(tab)):
8         if tab[i] == val_max:
9             ind_max.append(i)
10    return (val_max, ind_max)
```
