

Correction

Script Python

```
1 def ajoute(indice, element, liste):
2     nbre_elts = len(liste)
3     L = [0 for i in range(nbre_elts + 1)]
4     if indice < nbre_elts:
5         for i in range(indice):
6             L[i] = liste[i]
7             L[indice] = element
8         for i in range(indice + 1, nbre_elts + 1):
9             L[i] = liste[i-1]
10    else:
11        for i in range(nbre_elts):
12            L[i] = liste[i]
13        L[nbre_elts] = element
14    return L
```
