

Correction

Script Python

```
1 def positif(pile):
2     pile_1 = list(pile)
3     pile_2 = []
4     while pile_1 != []:
5         x = pile_1.pop()
6         if x >= 0:
7             pile_2.append(x)
8     while pile_2 != []:
9         x = pile_2.pop()
10        pile_1.append(x)
11    return pile_1
```
