

Correction

Script Python

```
1 def recherche_indices_classement_elt, tab):
2     ind_inf = []
3     ind_egal = []
4     ind_sup = []
5     for i in range(len(tab)):
6         if tab[i] < elt:
7             ind_inf.append(i)
8         elif tab[i] > elt:
9             ind_sup.append(i)
10        else:
11            ind_egal.append(i)
12    return (ind_inf, ind_egal, ind_sup)
```
